Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews

Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "Interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.

SUBSTANCE OF INTERVIEW

1. The examiner withdrew the rejection of claims 70, 72 & 73 under 35 U.S.C. § 112 2nd paragraph as set forth in section 4.3 of the Office action mailed 17 June 2005.

2. The examiner argued in regard to claims 28 & 39 that since Drisko (4,718,784) would fairly teach:

A) as can be seen in column 1 that the prior art printing plates for labels as generated by "professional printers in print shops" can be replaced by labels that have been generated by programs running on a computer and that these generated labels may then be produced using a printer;

B) as can be seen in columns 2-4, a keyboard 32 of computer system 20 is used by the user to input the label designs that defines all the elements of the label: the dimensions of the label, the label's text strings, where the text strings are positioned, what size type to use, when to use bold print, and the placement of other special label features including boxes, bar code sequences, serial numbers, and graphic images which are store in memory as label design files 40 and which may be printed by system printer 22 under the appropriate control of system processor 24;

C) further as can be seen in "TABLE I" and "TABLE II" in columns 13-15 as described in columns 6-8, a label design file contains user designations of what is to appear at each position on a label as well as how the designated item in that position will appear.

2.1 From the above teachings it would have been inherent to one of ordinary skill at the time of the invention that the system of Drisko (4,718,784) would permit the user to assign position by position the claimed positional palette as would be consistent with what applicant has described as a positional palette see page 3, lines 12-17, "Another aspect of the invention assigns an attribute scheme, for example, a foreground color, a background color, a font type, a font size, a font style, shape and/or other attributes to one or more of the character positions of the labels in a job in which the labels may or may not be related in numeric sequence.", and at page 7, lines 19-23, "According to an aspect of the invention, a positional attribute scheme or palette is assigned to character positions 66, 68 and 70. Character positions 66, 68 and 70 each may have the same or different positional palettes."

Art Unit: 3639

3. The examiner further argued that functioning of Drisko (4,718,784) inherently requires the use of an user interface.

4. After reconsideration of the teachings of Drisko (4,718,784), as compared tot eh limitations of claim 73, the examiner withdrew the rejection of claim 73 in view of Drisko (4,718,784).

5. The claims are subject to further review and search.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Cosimano whose telephone number is (571) 272-6802. The examiner can normally be reached Monday through Thursday from 7:30am to 6:00pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Weiss, can be reached on (571) 272-6812. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (571) 272-3600.

6.1 The fax phone number for UNOFFICIAL/DRAFT FAXES is (571) 273-6802.

6.2 The fax phone number for OFFICIAL FAXES is (571) 273-8300.

6.3 The fax phone number for AFTER FINAL FAXES is (571) 273-8300.
